

## Patient Statistics (2011)

### “non-communicable diseases”

© Ärzte für Kerala, 2016

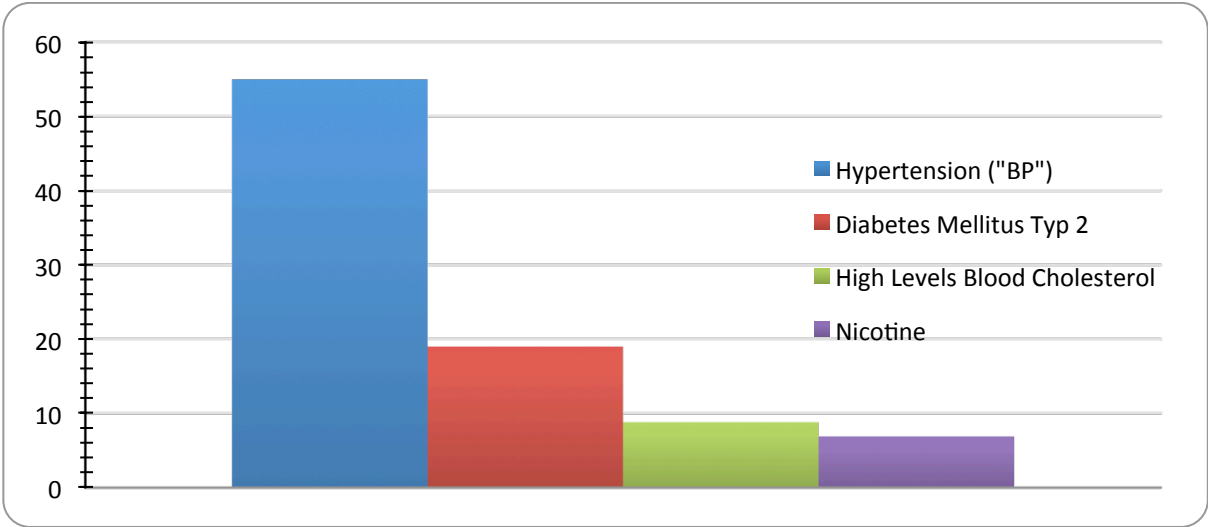

A survey of 215 patients has shown the following prevalence of diseases in our area:

#### 1. Main Diseases (percentage)

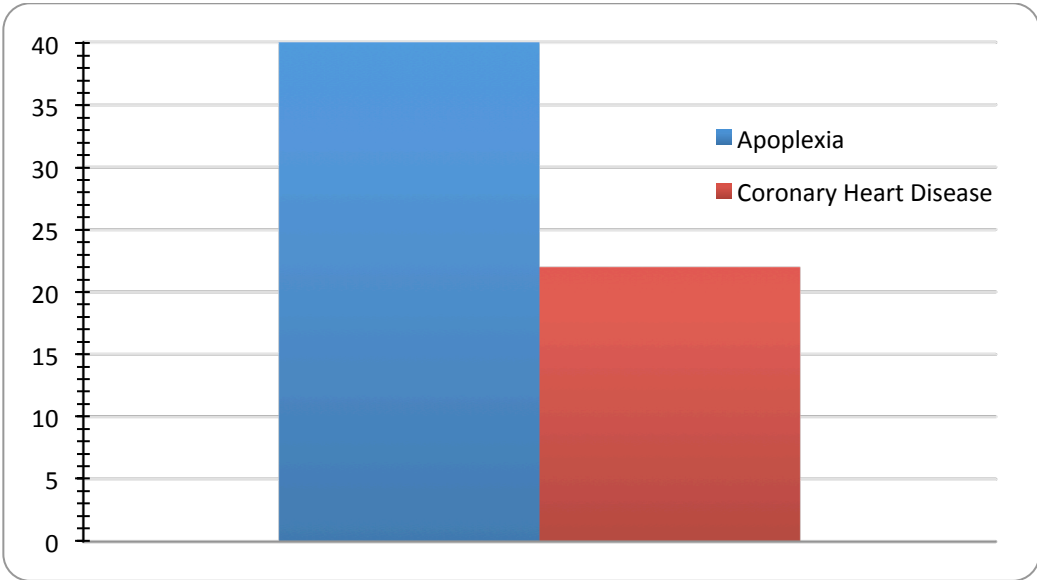

The six main diseases that we see in our patients are a typical list of the most important non-communicable diseases (NCDs). For a long time those were only thought to be problematic in western civilizations. In the last years it became more and more visible, that the NCD epidemic is one of the major health problems in the developing world.

2. Cardiovascular Risk Factors (percentage)

3. Main Cardiovascular Diseases (percentage)

#### 4. Distribution of the most regular disorders (percentage, NCDs and other diseases)
